RE: EMS (Environmental Monitoring System)
DATE: 09-NOV-2019 11:59 PM CST (GMT-6)
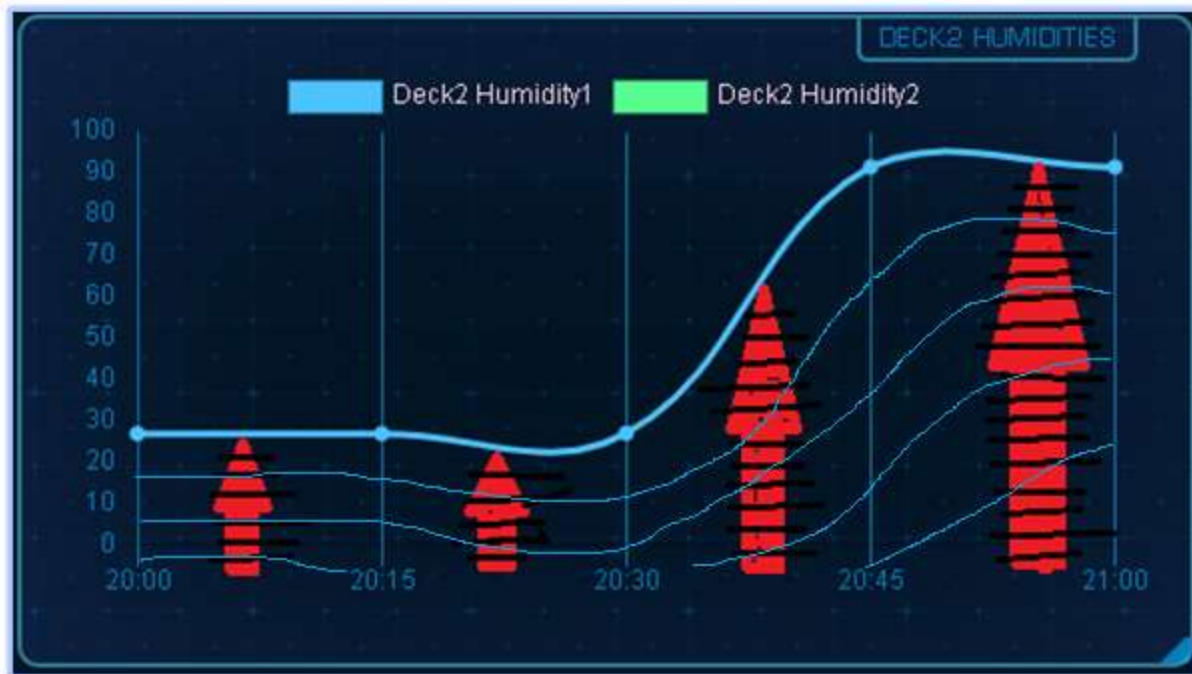

Hello Narendra,
   Please see the following issues**:**
Thank you,
Daniel.Summars@PalladiumTechs.com

(01) Is there a way to stop the ***flying*** of the trend-lines from the very bottom of each chart when the chart refreshes**?**
    Why does that happen**?**

(02) On the Sensors Dashboard (see below), prevent the title bar (as shown on the left below) from scrolling out-of-view (as shown below on the right) when scrolling down**:**
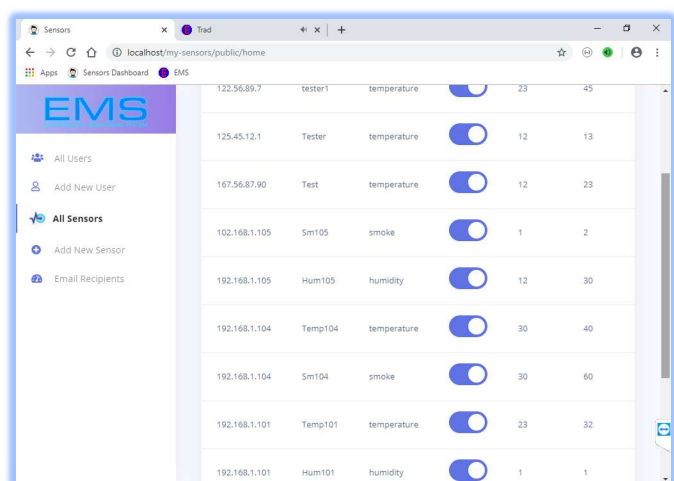

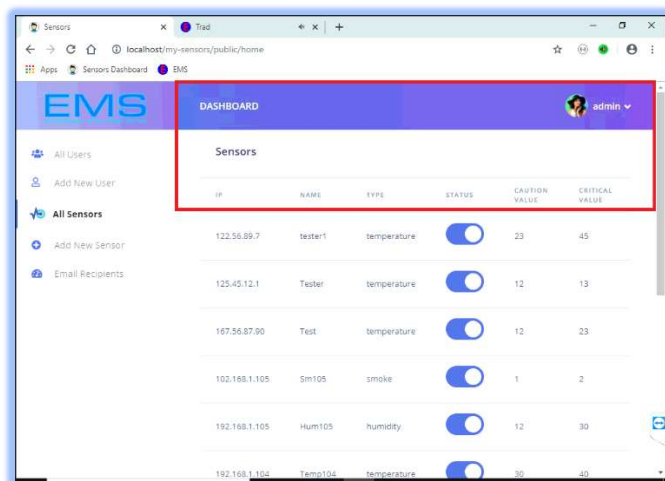

(03) When trying to add a sensor via the button, the following SENSOR SETUP dialog, and the progress/wait animation continues indefinitely (until the ESC key is pressed)**:**
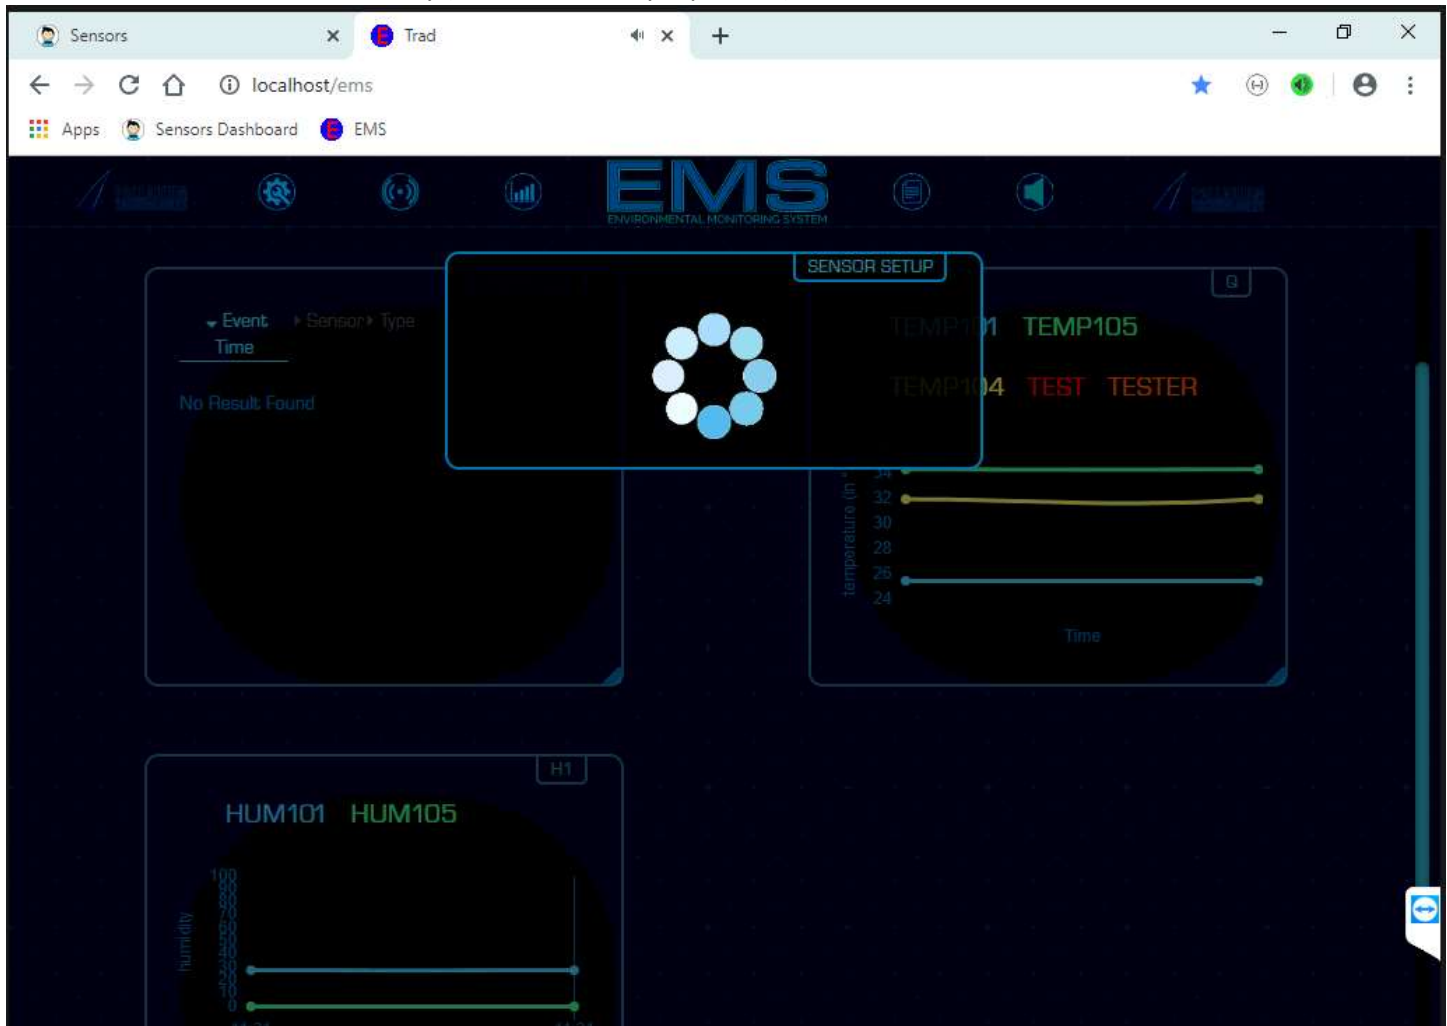

NOTE: Due to the issue above, it is not possible to test some features (e.g. such as adding and displaying a Smoke Sensor status, adding other sensors, etc.). Hence, additional testing is required.

(04) The following TREND (named "Q") does not show a line on the graph for TEST and TESTER.
Is this because there is no data*?*

(05) Regarding the Edit and Delete buttons**:**

(05.a) At **100%** ZOOM, the Edit and Delete buttons (as show here→ ☐) are not visible (i.e. they are off-the-screen). Please make the Edit/Delete buttons visible at 100% ZOOM).

IF necessary, make the status ⬤▬ buttons smaller, or recover some space from the empty column shown in the vertical rectangle below.
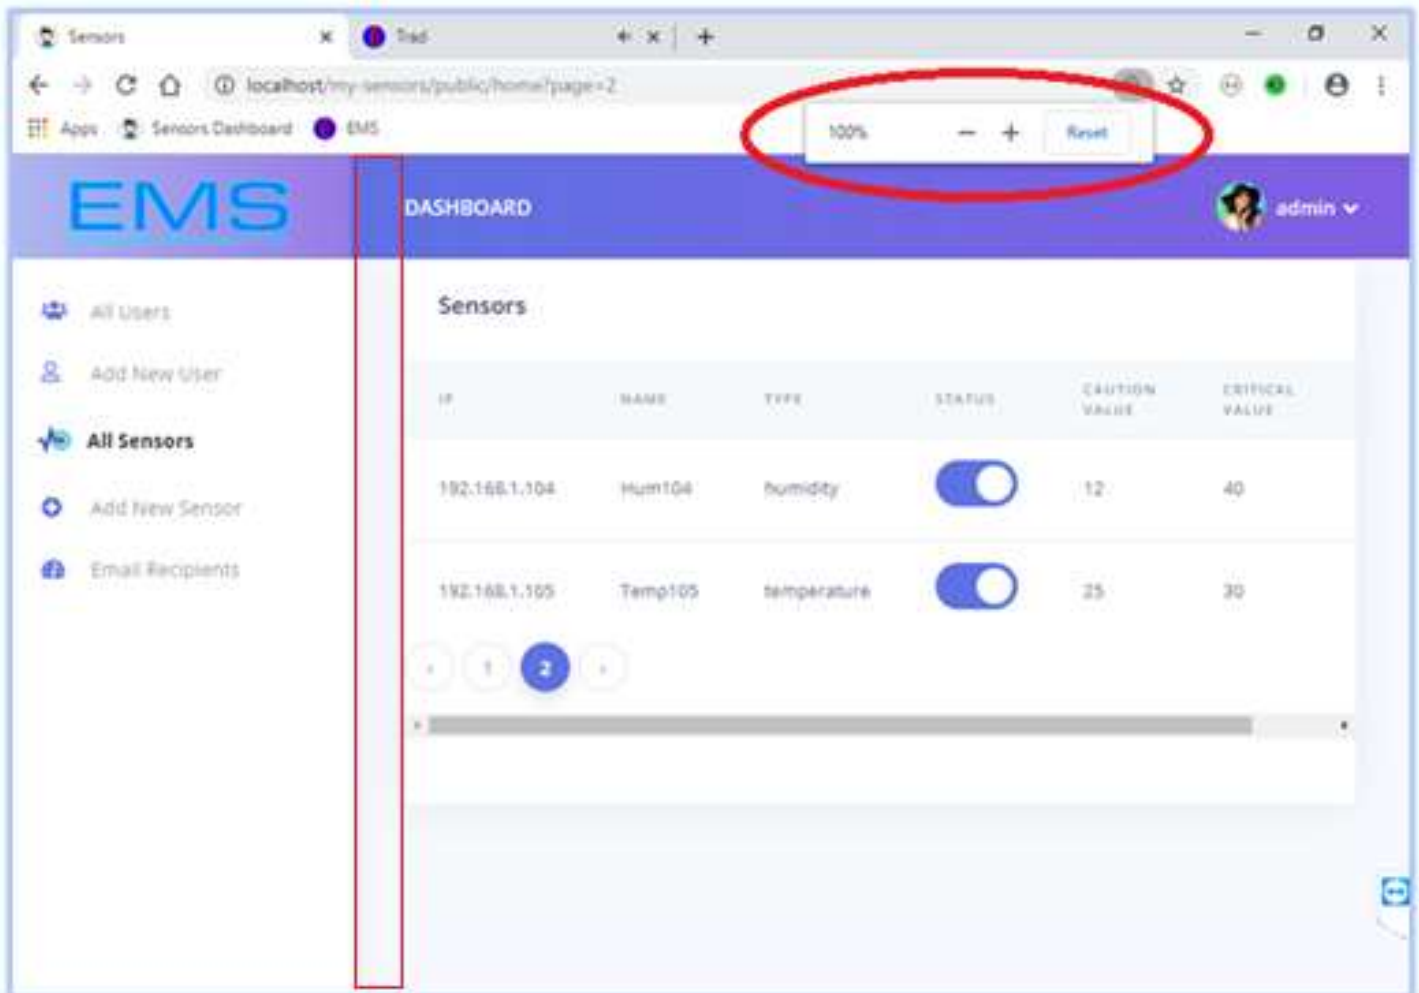

**(05.b)** After Zooming out, the Edit and Delete ⋮ buttons come into view, **but** are very difficult to see.

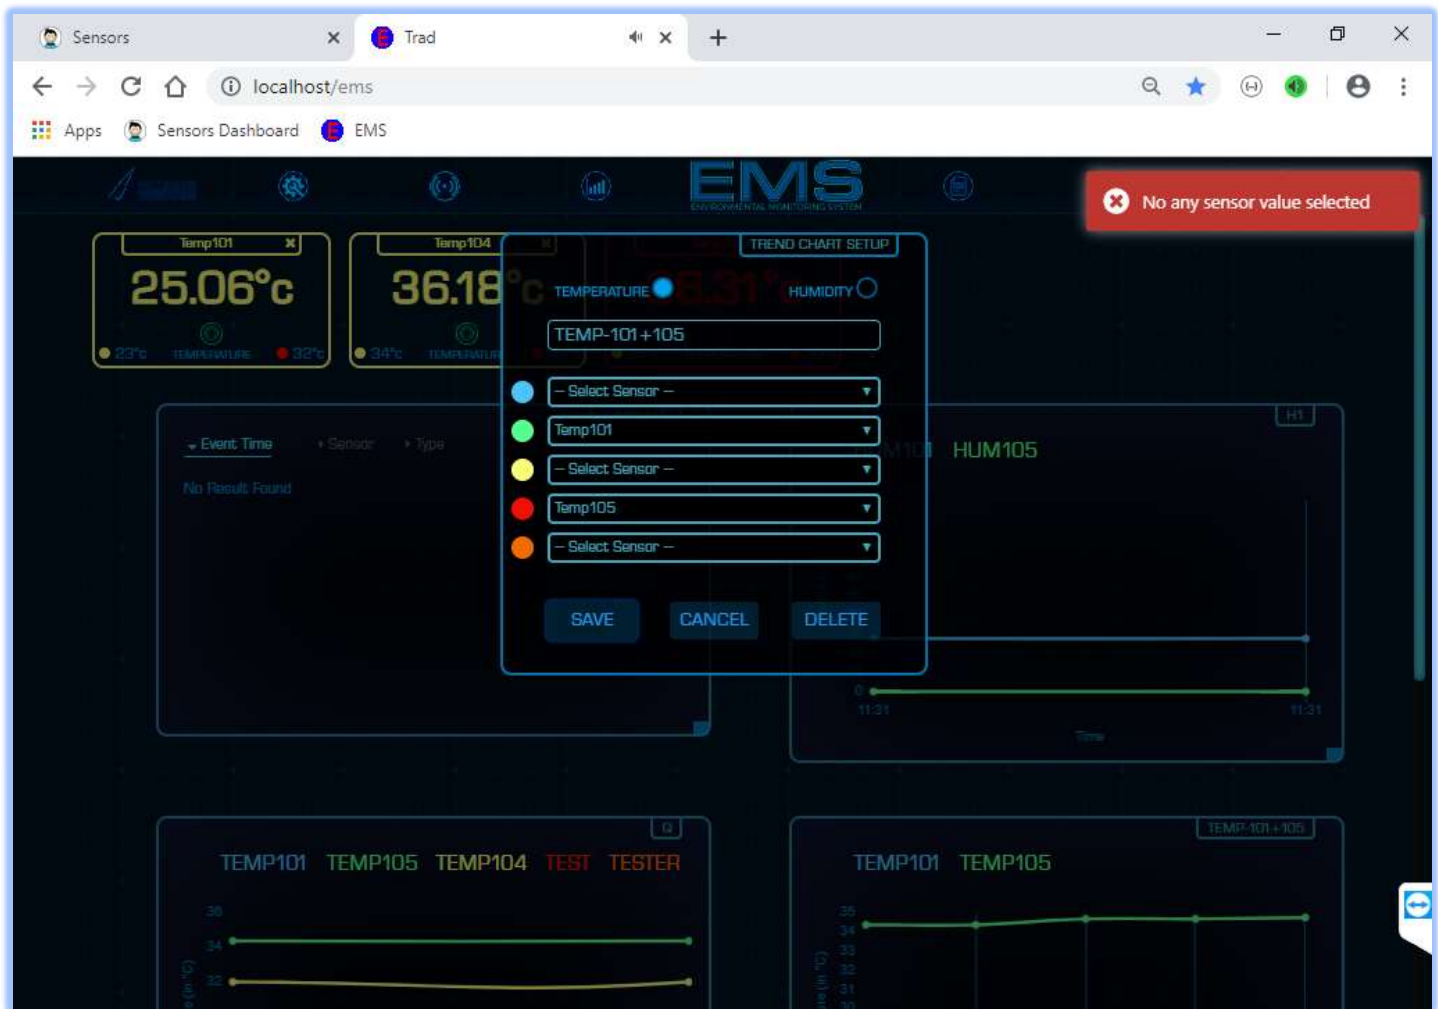

Please make those Edit/Delete buttons be more pronounced (more visible), such as a border, such as this →

(05.d) Please add a column-name on the Edit/Delete column (e.g. **Edit**).

(06) The following TREND (named: "TEMP-101+105") was not added (not visible) after clicking on the SAVE button:

That is, it appears that the error occurs when colors other than the top-most colors are chosen.

QUESTIONS:

---

(01) QUESTION: What is the password to phpMyAdmin for the MySQL database *?*
I will not be changing anything.
I only want to study the schema.
   ANSWER: ?

---

(02) QUESTION: What are the new Start-Up / Shut-down steps for the XAMP (web server, and other processes) *?*
ANSWER: ?

---

(03) QUESTION: What are the current sensors *?*
  ANSWER: See list below.

Sensors:

IP	NAME	TYPE	STATUS	CAUTION VALUE	CRITICAL VALUE
122.56.89.7	tester1	temperature	✔	23	45

IP	NAME	TYPE	STATUS	CAUTION VALUE	CRITICAL VALUE
125.45.12.1	Tester	temperature	☑	12	13
167.56.87.90	Test	temperature	☑	12	23
102.168.1.105	Sm105	smoke	☑	1	2
192.168.1.105	Hum105	humidity	☑	12	30
192.168.1.104	Temp104	temperature	☑	30	40
192.168.1.104	Sm104	smoke	☑	30	60
192.168.1.101	Temp101	temperature	☑	23	32
192.168.1.101	Hum101	humidity	☑	1	1
192.168.1.101	Sm101	smoke	☑	1	1

END.

IP	NAME	TYPE	STATUS	CAUTION VALUE	CRITICAL VALUE
